

ParishCast

Mass Communication Tool

ParishCast is a flexible and easy-to-use parish communication system that allows you to send emergency alerts, event reminders, and schedule updates to your parishioners. It simplifies communication and keeps your people up to date. Send parish-wide mass communications to your entire congregation or individual groups from anywhere and at any time.

Quick Communication

ParishCast empowers your parish so you can communicate quickly and effectively when a last-minute change occurs or an emergency strikes. Send severe weather alerts automatically to parishioners or inform them of schedule changes with ease.

Stay in Touch

Good communication is important to every parish, and ParishCast makes reaching others quick and convenient. Ensure your parish's voice is heard by sending messages instantly or scheduling them in advance to connect with group leaders, parishioners, and volunteers.

Volunteer Registration

ParishCast allows you to communicate via email, text, or voice messaging to request volunteers for a one-time or recurring event. This flexibility assures that your message is heard so they can be aware of opportunities and easily sign up to serve.

Prayer Requests

Reach out to your entire parish or specific groups within the parish to ensure that your prayer request list is up-to-date and accurate. Gather new prayer requests and update current prayers.

Voice Messages

ParishCast provides numerous text-to-speech options for your voice messages. But we know nothing can replace hearing an announcement in a voice you recognize, which is why ParishCast allows you to always record your messages in your own voice.

Social Media Integration

Mass communication can be sent with ParishCast. However, did you know that with social media integration you can send a message and then automatically post that notification to your parish's social media accounts? Now people can get your message no matter how they desire to receive updates.

Advanced Reporting

With numerous reporting options in your ParishCast Command Center, your parish can view which messages were the most successful. Choose to boost engagement and ensure news is shared more effectively throughout your parish.
